SFS strengthens its competence in the field of micro injection moulding for the medical industry

The SFS Group acquires Stamm AG and thereby strengthens its technology competence in the field of micro injection moulding. Stamm AG is a preferred development and manufacturing partner, supplying leading companies in the medical component as well as in other industries.

SFS Group AG acquires Stamm AG in Hallau (Switzerland) as a means of securing the continuation of the company. It produces high-precision plastic injection moulds in the technical small and micro range for a number of sophisticated applications. With this acquisition, the Industrial division (Engineered Components segment) strengthens and supplements its competence in the field of micro injection moulding. Stamm AG is a preferred developer and manufacturer in this field and pursues a very similar business model to the SFS Group. Stamm AG's customer portfolio largely complements that of SFS and thereby provides extended access to first-class companies in the medical component and other industries for the Industrial division.

Stamm AG was founded in 1947 and, with a workforce of 60, achieved sales of approx. CHF 15 million in 2015. The SFS Group intends to strengthen and further develop the existing facility as a competence centre, in particular for applications in the medical components industry. By adding the company to SFS Group, its customers gain access to the range of services and the know-how provided by SFS. It was agreed to keep the purchase price confidential.

About SFS Group

SFS Group is organised into three business segments Engineered Components, Fastening Systems und Distribution & Logistics which represent the three business models. In the **Engineered Components** segment, SFS partners with customers to develop and manufacture customer-specific precision formed components, fastening solutions and assemblies. The segment operates in the Automotive, Electronics and Industrial divisions and sells its products under the SFS intec (Automotive, Industrial) and Unisteel (Electronics) brands. In the **Fastening Systems** segment, consisting of the Construction and the Riveting divisions, SFS develops, manufactures and markets application-specific mechanical fastening systems under the SFS intec (Construction) and GESIPA (Riveting) brands. In the **Distribution & Logistics** segment with the SFS unimarket brand, SFS is a leading provider of fasteners, tools and architectural hardware as well as innovative logistics solutions in Switzerland. SFS Group is a global player with manufacturing sites and distribution companies at 72 locations in 24 countries around the world. Sales in business year 2015 amounted to CHF 1.376 bn and the work force numbered approximately 8,300.
